Cotiviti IPO – Executive Summary

Company Overview

Cotiviti's healthcare team is comprised of doctors, nurses, claims coders, forensic auditors, and other experts who monitor various medical and payment policy content sources to develop algorithms and concepts that incorporate the latest standards.

- Cotiviti Holdings was formed through the merger of Connolly Superholdings, a leading retrospective payment (post-payment) accuracy solutions provider and iHealth Technologies, a premier prospective payment (pre-payment) accuracy solutions provider for healthcare and retail industries.
- By exploiting the unique capabilities of these two companies, and adding to them, Cotiviti has emerged as one of the largest payments service providers that offers both prospective and retrospective solutions.
- Cotiviti provides healthcare solutions for a wide range of payers, including, Commercial health plans, Medicaid, and Medicare. The company has strong capabilities in areas such as Billing Accuracy, Contract Compliance, Payment Responsibility Attribution, Clinical Appropriateness, and Surveillance and Analytics.
- Cotiviti provides retail solutions under its Connolly division. These solutions are offered in areas like Merchandise and Expense Accounts Payable, Contract Compliance, Activation-Based Commissions, Pharmaceutical Procurements, and Freight Auditing.

Cotiviti IPO – Executive Summary

Company Overview

Cotiviti applies its analytics-driven payment accuracy solutions at multiple points across the client's claims processing cycle. Its extensive library of complex payment analytics is designed to identify, select and make recommendations for correct application of contracts and coding to meet client payment policies.

Cotiviti's Healthcare Claims Payment Process

1. After treating the patient, healthcare provider submits a claim to the health plan that includes procedure and diagnosis codes.
2. Health plan receives the claim and:
 - a) Validates member and provider identification, eligibility, pre-authorizations and benefit coverage
 - b) Applies provider contract & fee schedule to price the claim
 - c) Completes the process with final claims systems edits & rules
3. Payer leverages internal tools and third party solutions to conduct final claims analysis review prior to payment.
4. Payer transfers funds to provider with supporting payment details.
5. Payer leverages internal tools and third party solutions to conduct claims analysis after a claim has been paid.

Cotiviti's Solutions

Prospective Claims Accuracy Solutions- Cotiviti's prospective claims accuracy solutions help in identifying claim discrepancies. The discrepancies are generally found after the claim adjudication process and before settling a claim with a healthcare provider. The claims are settled based on correct coding and clinical guidelines, and in complete conformity with regulatory, compliance, industry, and health plan requirements.

Retrospective Claims Accuracy Solutions- Cotiviti's retrospective claims accuracy solutions help health insurers identify and resolve payment inaccuracies after a claim has been paid to a healthcare provider. These solutions utilize sophisticated analytics and data mining tools to identify potential inaccuracies. The company's claim analytics solutions include longitudinal reviews of data to identify discrepancies that may span multiple claims and time periods.

Surveillance and Process Optimization Solutions- Cotiviti provides analytics and support to its clients in optimizing their operations and enterprise-wide claims payments and trends. These offerings include selective anti-fraud analytics to identify abnormal patterns in coding and billing practices. The Company also provides its clients with ongoing surveillance and longitudinal analytics by reviewing claims submissions and payments across multiple dimensions.

Cotiviti IPO – Executive Summary

Market Opportunity

The market for payment accuracy solutions is growing significantly owing to rising healthcare costs and payment complexities. It is expected that healthcare providers will continue to spend on billings with rising inaccuracies. Payments accuracy solution providers can reduce the time and cost spent on such inaccuracies efficiently.

Healthcare providers face complexities in their services in the form of:

Complex reimbursements model- With a shift to the value-based and risk sharing model, reimbursements have become complex. Healthcare providers require additional data sources and multiple payment points to deliver better patient outcomes.

Coding complexities- With the advancements in technology, healthcare providers develop an increasing number of treatment options for patients. This gives rise to an increasing number of diagnostic codes, used for reimbursement purposes and a need for an accuracy in payments.

Need for specialized solutions- Healthcare providers face continuous expansion in the volume and value of healthcare claims, They require specialized payment accuracy solutions such as retrospective and prospective solutions at multiple points in the claims payment process.

Need for up-to-date payment solutions- With an increase in the number of claims, healthcare providers require up-to-date algorithms and analytical solutions for their customer database.

Source(s): Company's 424B4 filings

Cotiviti's platform has the ability to address the following:

5.9%

is expected to be the average annual rate of healthcare costs in 2024.

75%

of the company's clients had the ability to contribute to total savings generated in the payments accuracy market in 2016.

\$170 billion

is the value of healthcare waste generated due to inaccurate claims and payments in 2016.

Cotiviti intends to focus on the following points as part of its growth strategy:

- Increase the value of claims reviewed by the solutions;
- Expand the existing client base;
- Expand the use of its analytical tools for other purposes;
- Continue to innovate and further develop the existing platform;
- Pursue partnerships and acquisitions to enhance solutions and for cross-selling purposes.
