## Company Overview

### OVERVIEW

- The company serves banks, technology companies, telecommunication companies, and healthcare and life sciences companies through its direct sales force.
- Cloudera has a strategic partnership with Intel Corporation, which owned 22 percent of the company prior to the IPO.
- Key Offerings:
  - Cloudera Enterprise Data Hub is a secure and flexible big data software that offers data engineering and science an operational database with real-time insights for modern data-driven business and an analytic database.
  - Cloudera Analytics DB is a modern analytic database, powered by Apache Impala (incubating), and is the only solution that brings high-performance SQL analytics to big data.
  - Cloudera Operational DB delivers a secure, low-latency, high-concurrency experience that can extract the real-time insights companies need from big data.
  - Cloudera Data Science & Engineering provides better access to Apache Hadoop data with familiar and performance tools that address all aspects of modern predictive analytics.

### KEY STATISTICS

#### *Revenue Mix:*

*Subscription Software (75%-80%)*

*Professional Services (10%-15%)*

*Training (5%-10%)*

*Partner Ecosystem of 2,600+ companies, focusing their efforts on the largest 8,000 corporate enterprises globally (Global 8000) as well as large public sector organizations. As of January 31, 2017, Cloudera has approximately 500 Global 8000 customers, and they represent 73% of total revenue.*

*Funding to Date of over \$1 billion (Primary Capital)*

*Founded 26 Hadoop Ecosystem Projects*

*Cloudera Engineers occupy 111 Apache Hadoop Committer Seats and more than 80 Project Management Committee seats*

## Customer Case Studies in the Finance Sector

### Citigroup Global Markets

- Citi is one of the world's largest global financial institutions with \$69 billion in annual revenue and 219,000 employees.
- Citi's existing infrastructure held siloed data and did not provide the desired stability and elasticity. Citi launched an initiative to transform business data into a strategic enterprise asset and sought to create a centralized, shared platform for enterprise-wide data and analytics.
- Citi implemented Cloudera's platform to support its Big Data Analytics Platform in 2013.
  - The initial 50 node North American deployment has grown to over 4,000 globally, an 80x increase
  - Citi has expanded to 35 projects incorporating Cloudera's proprietary technology, and has enjoyed the scalability, manageability, and functionality benefits of the platform
  - Specific advanced analytics and mission critical use cases include anti-money laundering, digital marketing, fraud detection and client prospecting

### Experian

- Experian is the world's leading global information services company with more than 17,000 employees in 37 countries.
- Experian is investing in new technologies and innovation to help clients maximize every opportunity. Experian helps individuals to take financial control and access financial services, businesses to make smarter decisions, lenders to lend more responsibly, and organizations to prevent identity fraud and crime.
- Experian implemented Cloudera Enterprise Data Hub across its Credit Information Services, Decision Analytics, Marketing Services and Business Information Services business lines.
  - The application improved credit analysis and advanced delivery capabilities to serve its financial clients
  - They reported being able to meet client service level agreements with reliability and reduced machine learning and advanced analytics processing time for credit analysis

*Data analytics and machine learning are becoming critical to financial institutions.*

## Market Opportunity

### CLOUDERA PLATFORM ADDRESSES THREE NEW TRANSFORMATIVE MARKETS

<b>\$8.7 Billion</b>	IDC estimates that the new market size is \$8.7 billion in 2015	<b>\$22.1 Billion</b>	IDC projects that the new market size will grow to \$22.1 billion in 2020	<b>20.5%</b>	This represents a CAGR of 20.5%.	<b>\$65.6 Billion</b>	Expected value of the US online business lending market by 2025
----------------------	---	-----------------------	---	--------------	----------------------------------	-----------------------	---

<b>Dynamic Data Management Systems</b>	Technologies within this market help enterprises capture and manage the increasing volume and complexity of new data.
<b>Cognitive / AI Systems and Content Analytics Software</b> <b>Advanced and Predictive Analytics Software</b>	Technologies within these two markets help enterprises generate insights and derive value from their data. The market for next generation data management, machine learning, and advanced analytics is large and rapidly growing as the world increasingly connects.
<b>Disruption of Traditional Markets</b>	Beyond the above three new markets, Cloudera's platform addresses and is disrupting traditional markets, including a significant portion of the Relational Database Management Systems and Non-Relational Database Management Systems markets. Technologies within these markets represent traditional systems used by enterprises to manage their data. The combined addressable opportunity is expected to reach \$65.6 billion by 2020.
